

Crazy ChemWorks

For kids entering grades 1-6

Explore chemistry concepts such as the states of matter, acids & bases, atoms, molecules, reactions and so much more! Your scientist will take home a full set of labware.

Secret Agent Lab

For kids entering grades 1-6

Develop secret agent & detective skills in this hands-on week of fun! Uncover the science of analyzing evidence—from fingerprints to tracks to trash! Discover how detective use chemistry and forensics. Explore secret agent gadgets. Reading at 1st grade level required.

Space & Beyond!

For kids entering grades 1-6

Co-designed with NASA! From our atmosphere and beyond, this program sends children on a quest for exploration. They discover comets, planets, stars, the four forces of flight and the challenges of space travel, participate in an awesome rocket launch and build a rocket to take home!

Eureka! Invention

For kids entering grades 1-6

An exciting program exploring famous inventors such as da Vinci, Edison, Archimedes, Franklin and even Rube Goldberg and contributions each made to science, engineering and society. Guided by our Mad Scientist, children use knowledge and creativity to overcome a series of challenges using basic materials, simple machines, tips from famous inventors and most importantly.

Brixology w/LEGO®

For kids entering grades 1-6

Children learn about engineering principles while teaming up to construct unique engineering-themed projects using LEGO® bricks. They will build a space station, drawing machines, a carnival ride and more, while solving real-world design challenges!

Rockin' Rockets

For kids entering grades 1-6

Become a rocket scientist & learn the fundamentals of flight, propulsion, rocket design, launch & recovery. Explore hot air balloons to hovercrafts and more! There's an exciting rocket launch every day & kids build & take home their own Mad Science rocket.

Red-hot Robots (w/Coding Day)

For kids entering grades 1-6

Children will build and take home their own robot while learning about circuits, wheels, gears, and sensors. They explore different robotic devices including line-tracking and programmable robots with coding. They'll also learn about simple machines used to make life easier. All supplies included.

NEW! Underground Explorers

For kids entering grades 1-6

Dig up dinosaurs and ancient past! Solve real-life mysteries! Kids learn about archaeology and techniques used to excavate fossils and long-lost cities! They also study bone fragments, pottery shards, amber deposits, and fossils to see what they can tell us about history! Each class includes a make and take-home project, like a fossil reproduction, amber time capsule, and coins from around the world!

Not all programs available all weeks depending on other bookings. Please book early! For pricing and scheduling, please call us at 413-584-7243 or email us at ✉ summerprograms@madsciencewne.com

MAD SCIENCE SUMMER/VACATION PROGRAMS

Bring a Mad Science summer/vacation program to your community! Our interactive, engaging programs allow kids to explore the different fields of science in an interesting and entertaining way. You could be inspiring the next Einstein or Marie Curie! All our programs are on-site, and can be indoor or in an outdoor pavilion.
